The TOX-OER (Learning Toxicology through Open Educational Resources) is an international project that joins institutions from seven European countries with the aim to develop a massive open online course (MOOC) on Toxicology. The MOOC is an E-learning platform accessible on-line and open freely to general public at various levels of knowledge. Each participant can choose the course level that suits him or her, and progresses to higher levels if interested. The course also includes various forms of training and self-evaluation. The platform handling is very easy and intuitive, and study materials are prepared in a visually attractive way containing many illustrative diagrams and figures, videos and animations.

Supported by the TOX-OER project 2013-1-ES01-KA203-015957.
